

Appl. No.: 10/080,023

Attorney Docket No.:10541-1281

I. In the Specification

Insert the following paragraph before the first paragraph of the Application:

CROSS-REFERENCE TO RELATED APPLICATION

The present application is a divisional of United States Serial No. 09/298,444, filed April 23, 1999, and entitled "Solenoid Operated Hydraulic Control Valve".

Please make the following amendments to the specification on page 1 lines 23-32:

U.S. Patents ~~4,687,893~~ and 5,513,673 describe a hydraulic control valves for use with a solenoid, ~~each valve having three control lands, at least two of which, have of unequal diameter and a long bore orifices extending through the valve body. The valves are is stable due to the presence of positive hydrodynamic damping; however, they are it is expensive to manufacture and requires a large lateral package space.~~

U.S. Patent 5,615,860 describes a hydraulic control valve for use with a solenoid, the valve having two control lands of substantially unequal diameter.
